PROJECTS

Journal / Diary Writing Website

🔗 <https://github.com/hibafathimak/ReactJournal>
Using React and JSON-Server

- A React-based journal app that lets users create, read, update, and delete entries using a JSON-powered API. It includes reminders to stay organized and a vision board to visualize goals, combining simplicity with practical features for better personal organization.

Chat Application

🔗 <https://github.com/hibafathimak/ReactChatAppFrontend>
Using React, WebSockets and Redux

- A real-time chat application built with React.JS, where users can communicate anonymously or interact with other users.

JavaScript Memory Card Game

🔗 <https://github.com/hibafathimak/memory-game>
Using HTML, CSS and JavaScript

- The game features a grid of cards, each hiding a unique pair of icons or images. Players click on cards to reveal their hidden content and match pairs to win.

Bookstore Application

🔗 https://github.com/hibafathimak/NovelNest_frontend
Using MERN stack (MongoDB, Express.js, React.js, and Node.js)

- A Bookstore web application designed to manage a collection of books and provide users with the ability to browse, search, purchase, and review books.
